Technical and Project Information

The operator runs defined leak-test cycles, checks equipment readiness, loads and connects products, verifies test conditions, evaluates automatic or procedural criteria and records nonconformities.

Expected background

- Production-test or laboratory-equipment experience
- Careful handling of seals, fixtures and measurement equipment
- Understanding of pressure and vacuum safety
- Ability to follow work instructions and escalation rules

Training, supervision level, location, working hours, compensation and vacancy status are subject to confirmation.

WORLDWIDE PROJECT CONTACT

Send the test object or system, operating conditions, target sensitivity or pressure range, applicable standard, destination country, quantity and schedule. LeakLab will review the project scope.

mail@leaklab.org

Regarding: Leak-Test Operator

Specifications, standards, verification scope, availability and commercial terms must be confirmed for the exact configuration and destination jurisdiction before order or project acceptance.
