Technical and Project Information

Instrue measurement and vacuum-related products are listed only where an exact product configuration can be supported. Selection requires the current manufacturer documentation.

CBVAC supplies vacuum pumps, pumping stations and related components referenced throughout this catalog. Technical data and included equipment depend on the exact model and ordering code.

ASAIR develops sensing products used in environmental, pressure and related measurement applications. Only products with a confirmed model and datasheet should be selected for a vacuum project.

KYKY is a manufacturer of vacuum pumps, valves, gauges, helium leak detectors and electron-optical instruments. Products shown on this site are selected and specified by exact model.

WORLDWIDE PROJECT CONTACT

Send the test object or system, operating conditions, target sensitivity or pressure range, applicable standard, destination country, quantity and schedule. LeakLab will review the project scope.

mail@leaklab.org

Regarding: Partners

Specifications, standards, verification scope, availability and commercial terms must be confirmed for the exact configuration and destination jurisdiction before order or project acceptance.
