Technical and Project Information

This technical overview covers Modern Flowmeters: Types, Operating Principles, and Model Selection. It is retained for technical context; specifications, availability, dates, commercial terms, and compliance statements must be reconfirmed for every current project.

International project context

For a current application, specifications and availability must be checked against the exact equipment configuration, destination country, operating conditions, and required standards. Legacy announcements do not constitute a current quotation or compliance statement.

Discuss your application

Send the test object, process conditions, target sensitivity or vacuum range, acceptance criteria, quantity, and schedule. LeakLab will review the information and confirm a suitable technical route.

- AS200B / AS200L Digital Gas Mass Flow Controller, 50-300 SLM Availability on Request Request a Quote Request a Quote
- AS200 Digital Gas Mass Flow Controller, 3-30 L/min Availability on Request Request a Quote Request a Quote
- AMC2000 Digital Gas Mass Flow Controller, 100-1000 mL/min Request a Quote Request a Quote
- LeakLab-R Low-Flow Gas Meter, 0.025-1 L/min Availability on Request Request a Quote Request a Quote

WORLDWIDE PROJECT CONTACT

Send the test object or system, operating conditions, target sensitivity or pressure range, applicable standard, destination country, quantity and schedule. LeakLab will review the project scope.
