Technical Data

PARAMETER	PUBLISHED VALUE / INFORMATION
Width	100 cm
Height	65 cm
Depth	70 cm
Weight	36 kg
Materials	Metal and laminated chipboard
Color stated in source record	Burgundy and light gray
Configuration	Wheeled industrial equipment table supplied unassembled
Warranty stated in source record	12 months; confirm the applicable order terms

Technical and Project Information

Mobile equipment cart designed to carry a leak detector and an auxiliary backing pump in production or laboratory areas. The metal and laminated-chipboard structure provides separate equipment levels and wheeled mobility. The product record describes the cart; confirm whether any pump, mounting hardware or electrical accessories are included in the quoted scope.

- Provides space for a leak detector and an auxiliary backing pump.
- Wheels allow the equipment assembly to be moved within a workshop or laboratory.
- Compact layout helps keep the detector and pump accessible for operation and service.
- Unassembled delivery simplifies transport to the installation area.

An auxiliary backing pump can increase effective pumping capacity and reduce pump-down time when correctly selected and connected, but performance depends on the complete vacuum system.

The source record describes the cart and its intended pump location; it does not clearly state that a pump is included. Confirm the supplied components, load capacity, wheel brakes, mounting points, detector and pump dimensions, vibration isolation, hose routing and electrical safety before ordering.
