Technical and Project Information

This service page outlines a project-based approach to Ultrasonic Testing of Calcium-Silicate Bricks and Units to GOST 24332-88. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Refractory Concrete Products to GOST 24830-81. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Reference Blocks for Ultrasonic Testing of Aluminium-Alloy Products to GOST 21397-81. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing to GOST 26266-90. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Thickness-Gauge Testing to GOST R 55614-2013. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Brazed Joints to GOST 26126-84. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Round and Rectangular Bars and Billets to GOST 21120-75. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Multilayer Plain Bearings to GOST R ISO 4386-1-94. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Concrete Strength to GOST 17624-87. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Thickness Measurement of Pressure Steel Pipes to GOST R ISO 10543-99. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Integrity Testing of Pressure Steel Pipes to GOST R ISO 10332-99. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Lamination Testing of Steel Pipes to GOST R ISO 10124-99. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Seamless Metal Pipes to GOST 17410-78. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Ferrous and Non-Ferrous Forgings to OST 24507-80. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Reinforcing-Bar Butt Welds to GOST 23858-2019. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Heavy Plate to GOST 28831-90. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Welded Joints to GOST R ISO 17640-2016. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Welded Joints to GOST R 55724-2013. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Railway Rails to GOST 18576-96. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

This service page outlines a project-based approach to Ultrasonic Testing of Rolled Sheet to GOST 22727-88. The exact scope, method, acceptance criteria, documentation, schedule, and destination-country requirements are confirmed during technical review.

WORLDWIDE PROJECT CONTACT

Send the test object or system, operating conditions, target sensitivity or pressure range, applicable standard, destination country, quantity and schedule. LeakLab will review the project scope.

mail@leaklab.org

Regarding: Ultrasonic Testing

Specifications, standards, verification scope, availability and commercial terms must be confirmed for the exact configuration and destination jurisdiction before order or project acceptance.
